PERLUDEM'S INITIATIVE FOR OPEN ELECTION DATA

KEY FOCUSES:

1. Making the election **more transparent and accountable**
2. Making **voters well informed** and foster their participation

INITIATIVE:

2014: **API PEMILU** (Silver OGP Award 2016)

2015: **5 years MoU** with KPU to make open election data

2015-2018: **Hackaton and Apps Challenge** for local election in subnational level

2019: Digitize 20+ election datasets as raw data for the development of **pintarmemilih.id**

2020: Research about **enabling civic tech ecosystems** to improve the integrity of elections

KAWAL PEMILU JAGA SUARA INITIATIVE

Digitize scanned form of result in polling station and recapitulation in each level into open data.

- To **oversee the voting and vote-counting process** in the 2019 elections, especially the presidential election and national legislative election;
- To **protect people's votes from manipulation**, improving public trust in the electoral process and result;
- To **increase public participation** in election monitoring activity;
- To promote the use of **e-recap technology**; and
- To **report any mistake or fraud** in election data
